Multi User Gateway – 1456B

- The Cloud platform allows you to manage buildings in an agile way, and the introduction of the interactive map allows you to identify them quickly
- You can manage your buildings both from the app and from the webpage, this allows you to work wherever you are.
- The via Cloud management allows the installer to share the configuration with the property manager in seconds, saving both a lot of time!
- Comelit offers 3 types of licenses and each license can be managed from up to 15 devices and it is possible to set different configurations for individual users or groups of users remotely
- 1x Multi User Gateway can serve up to 400 apartments, multiple gateways can be added to the system to allow for larger sites
