

# One button audio DDA door entry kit with voice prompts and back lit LCD display

## Introduction

The door entry kit has the following features:

- **Electronic call tone** - Upon a call being initiated, the telephone will attract the attention of the occupant with up to six rings.
- **Timed door release** - Upon pressing the door release button on the telephone, a dry contact relay within the door panel will energise for 5 seconds. (This can be adjusted using the PC programming kit)
- **Visual indication of call progress on the door panel** – The door panel has a back lit 2 line 16 character display which will indicate in English text, the stage of a call (i.e. CALL IN PROGRESS, SPEAK, DOOR OPEN etc). The call button will be illuminated permanently.
- **Call tone volume adjust** – The volume can be adjusted using a three position volume control located on the telephone.
- **Voice prompts** – Upon pressing a button the door panel will announce the call. Other announcements include ‘THE DOOR IS OPEN’ and ‘ANOTHER CALL IS IN PROGRESS PLEASE WAIT’
- **Programmable messages** – Using the PC programmer kit for the VX2200 series system it is possible to program two standby display messages, the door open time, flat numbers and occupants names and the voice as either male or female.

## Components

The standard components of the kit are as follows:

- **Door panel (2202/DDA)** - A one button vandal resistant flush fitting door panel with large illuminated call button with raised letters and Braille, a back lit LCD display and voice prompts.
