

VIP VIDEO DOOR ENTRY KITS:
THE DOOR ENTRY MONITOR AT YOUR
FINGERTIPS

 **Comelit**[®]
Passion. Technology. Design.

COMELIT APPS:
THE DOOR ENTRY MONITOR AT YOUR FINGERTIPS

The Menu can be used to:

- 1 - answer calls
- 2 - view and manage cameras
- 3 - call other internal units (in the contacts list)
- 4 - call other devices which have the APP installed

Intercall VIP

Video entry management only on local Wi-Fi

Remote Intercall VIP

Additional Wi-Fi / 3G remote video entry management

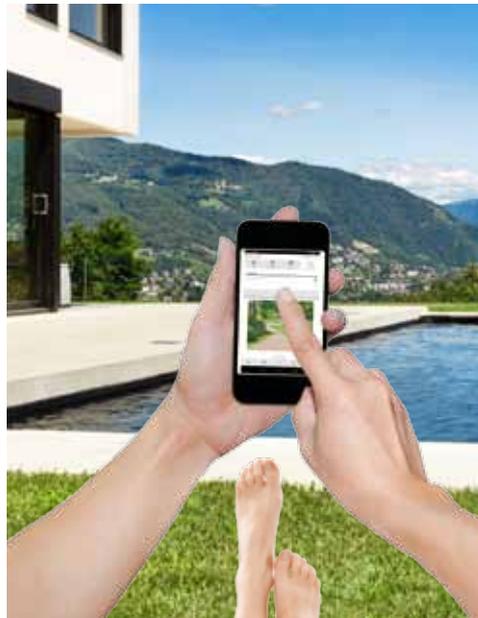

PC Intercom

Same functions as the APP but on PC/Mac

remotely

on-site

via PC/Mac

VIP KIT RANGE

INNOVATIVE SOLUTIONS FOR VIDEO ENTRY PHONE SYSTEM MANAGEMENT VIA SMARTPHONE, TABLET AND PC/MAC, USING THE LOCAL NETWORK OR ON THE MOVE USING 3G TECHNOLOGY

The door entry monitor is going mobile!

VIP KITS make it possible to use your own video entry phone system on a smartphone, tablet or computer, whether you are in the garden, by the pool, in another building or even overseas.

The Intercall Apps (available to download free of charge) for iOS and Android devices or the PC-Intercom software, developed by Comelit, can be used to answer calls from the external unit, make intercom calls, view images from the external unit camera and manage gate and door opening.

All kits in the VIP range are factory set to allow easy installation and instant use, but are still fully compatible with all other products in the VIP System. The VIP Manager configuration software (art. 1449) is required to program additional products.

VARIOUS SOLUTIONS TO MEET EVERY SPECIFIC REQUIREMENT

8512IM VIP KIT for Wi-Fi / 3G App with Planux door entry monitor

The kit contains a single-call ikall Metal external unit, a Planux door entry monitor, a Slave Gateway (for connection to a Wi-Fi ADSL router) and the corresponding power supply units.

8513IM VIP KIT for Wi-Fi / 3G App

The kit contains a single-call iKall Metal external unit, a Master Gateway (for connection to a Wi-Fi ADSL router) and the corresponding power supply units.

A door entry monitor does not need to be connected in order to use the Intercall Remote App.

8511I VIP KIT for Wi-Fi App

The kit contains a single-call iKall external unit, a VIP switch, a Planux door entry monitor and the corresponding power supply units.

8511IM VIP KIT for Wi-Fi App

The kit contains a single-call iKall Metal external unit, a VIP switch, a Planux door entry monitor and the corresponding power supply units.

8501I VIP KIT for PC-Intercom with ikall external unit

The kit contains a single-call ikall external unit, power supply unit and USB stick containing the PC-Intercom software (*).

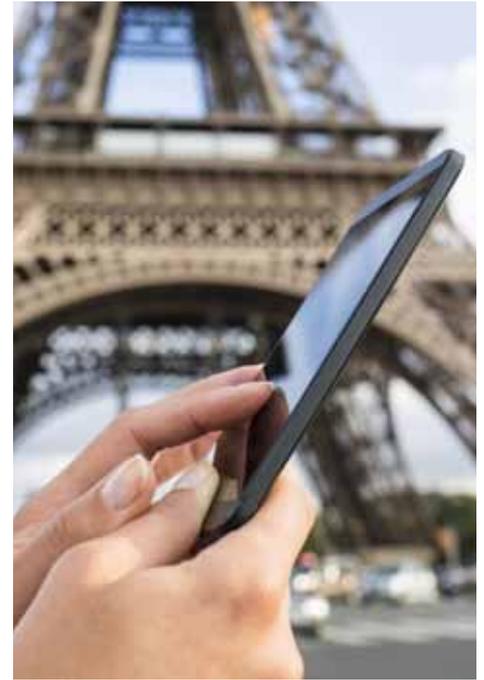

8501IM VIP KIT for PC-Intercom with ikall Metal external unit

The kit contains a single-call ikall Metal external unit, power supply unit and USB stick containing the PC-Intercom software (*).

8504 VIP KIT for PC-Intercom with Vandalcom external unit

The kit contains a single-call Vandalcom external unit, power supply unit and USB stick containing the PC-Intercom software (*).

(*) The stick must always be plugged into the computer to ensure correct operation.

remotely

VIP KIT FOR WI-FI / 3G APP WITH PLANUX DOOR ENTRY MONITOR

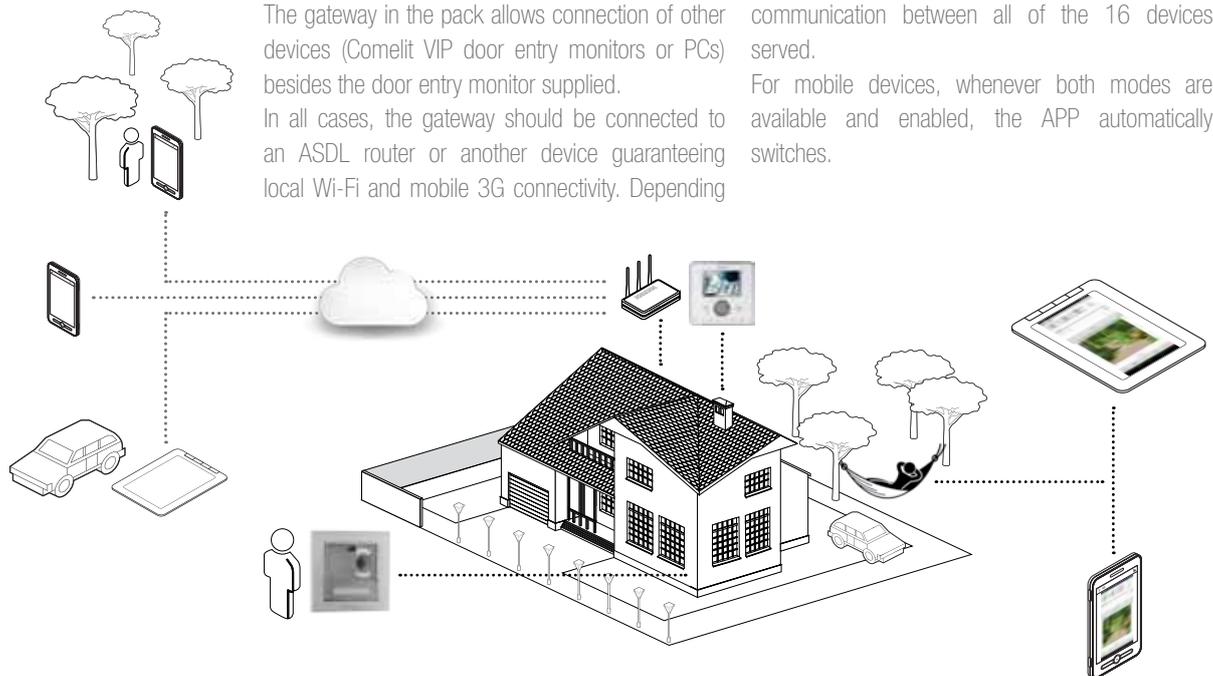

The kit allows use of the video entry phone system via a door entry monitor as well as tablets and smartphones on the Wi-Fi network, or remotely on 3G (or higher) networks.

The gateway in the pack allows connection of other devices (Comelit VIP door entry monitors or PCs) besides the door entry monitor supplied.

In all cases, the gateway should be connected to an ADSL router or another device guaranteeing local Wi-Fi and mobile 3G connectivity. Depending

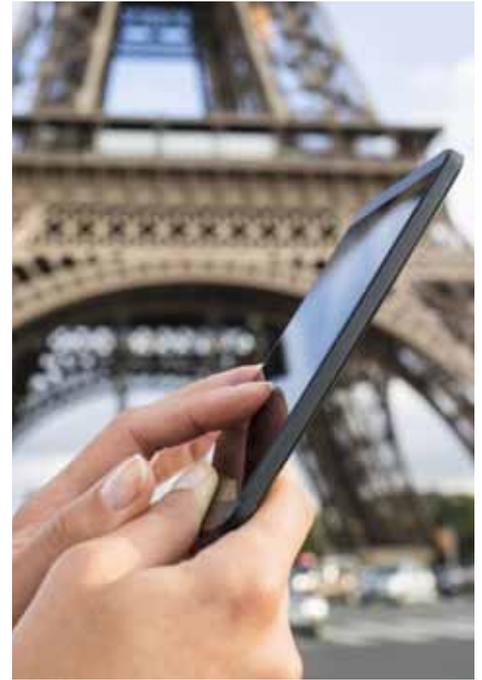

on bandwidth limitations, the gateway can serve up to 15 appliances (including door entry monitors, smartphones, tablets and PCs) with 4 simultaneous door entry monitor streams. It also allows "intercom" communication between all of the 16 devices served.

For mobile devices, whenever both modes are available and enabled, the APP automatically switches.

VIP KIT FOR WI-FI / 3G APP

The kit allows use of the video entry phone system via tablets and smartphones on the Wi-Fi network, or remotely on 3G (or higher) networks.

The gateway in the pack allows connection of a further 2 devices (Comelit VIP door entry monitors or PCs). In all cases, the gateway should be connected to an ADSL router or another device guaranteeing local Wi-Fi and mobile 3G connectivity. Depending on bandwidth limitations, the gateway can serve up

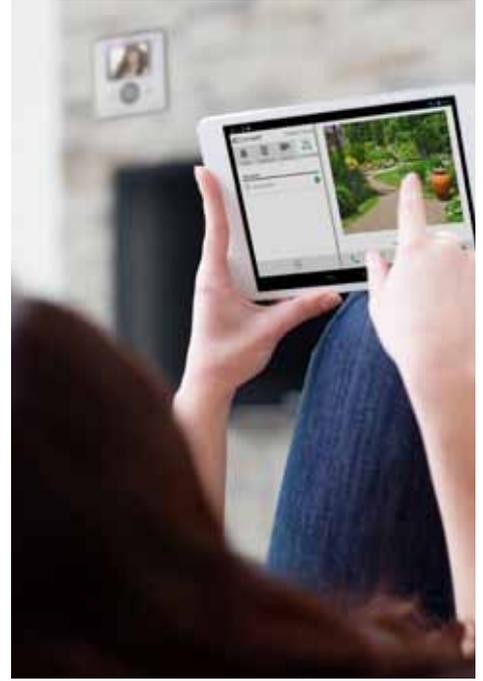

to 16 appliances (including door entry monitors, smartphones, tablets and PCs) with 4 simultaneous door entry monitor streams. It also allows "intercom" communication between all of the 16 devices served.

For mobile devices, whenever both modes are available and enabled, the APP automatically switches connection, from Wi-Fi to 3G and vice-versa.

on-site

VIP KIT FOR WI-FI APP

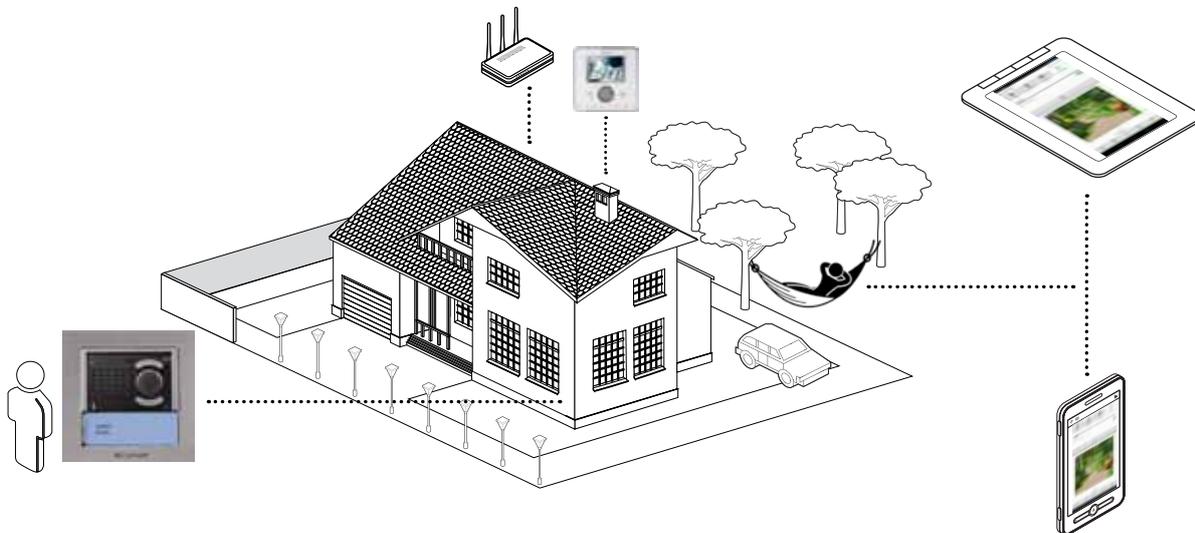

The kit allows use of the video entry phone system via a door entry monitor as well as tablets and smartphones on the Wi-Fi network.

The video entry phone system should nevertheless be connected to an ADSL router or another device guaranteeing Wi-Fi connectivity. Depending on bandwidth limitations, up to 16 appliances (including

door entry monitors, smartphones, tablets and PCs) with 4 simultaneous door entry monitor streams can be connected to the system.

It also allows "intercom" communication between all of the 16 devices served.

Mobile devices can only connect to the system via the Wi-Fi network.

via PC/Mac

KIT WITH PC-INTERCOM

The kit can be used to fully manage video entry phone calls via LAN (Ethernet or Wi-Fi). Simply insert the USB stick provided into the computer and install the software to receive calls and communicate with the external unit.

This software comes complete with a user license and is available for both PC and MAC systems. The key must always be plugged into the computer to ensure correct operation.
