

20004900

ENERGY METER WITH LOCAL AND REMOTE READOUT

Energy Meter that can measure 5 electrical circuits through connection of 5 current transformers art.20004910 (not included) and 2 pulse signal readings (water, GAS, etc...). The module communicates with the home automation system supervisors via the SimpleHome BUS or with the door entry system via the LAN port. The data obtained can be viewed in graph and table formats on compatible ViP door entry monitors and on home automation supervisors. Dimensions: 6 DIN. modules Power consumption: max 1.5W. Power supply: 12/24 Vdc or PoE.

20004900

ENERGY METER WITH LOCAL AND REMOTE READOUT

MAIN FEATURES

DIN rail mounted

Yes

FUNCTIONS

Loads management

Yes

GENERAL DATA

Operating temperature (°C)

-10 ÷ 40

COMPATIBILITY

Vip system

Yes

Home Automation system

Yes

MOUNTING/INSTALLATION

DIN modules (no.) (n°)

6

CONNECTIVITY

Inputs for current transformer (n°)

5

Pulse counter inputs

2 pulse counters

No. of Simplehome buses (n°)
