346250   relay module to control door lock not managed by BUS SCS

Technical data

Power supply from SCS BUS:	18 - 27 Vdc
Stand by absorption:	30 mA
Max. operating absorption:	270 mA
Operating temperature:	(-25) – (+70)°C
Protection index:	IP54
PI against mechanical impact:	IK10

Dimensional data

106 mm
185 mm
35 mm

cm
160 – 165

Configuration

**The device must be configured (only phisically) as follows:**

P - entrance panel number
The configurator in socket P of the speaker module assigns to this a recognition number inside the system.
The numbering of the entrance panels must always start from P=0. The entrance panel configured with P=0 must be a common (or main) entrance panel.

N - call number
Assigns the correspondence between the entrance panel pushbuttons and the audio handsets or video handsets.

Legend

1 - White LEDs for night lighting of the field of view
2 - B/W camera with slant adjustment horizontally and vertically by ±15°
3 - Green LED: door open notification
4 - Green LED: communication active notification
5 - System status LED: flashing green = put through call
                                      flashing red = busy system notification
6 - Loudspeaker
7 - Configurator socket
8 - Call keys
9 - Microphone
10 - Door lock opening sound enable/disable micro-switch
11 - Clamps for BUS connection and door lock: the module allows to control an electric door lock directly connected to the clamps S+ S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max)
12 - Microphone and loudspeaker volume adjustment

T – Door lock control time delay

configurator number

0= No configurator	1	2	3	4*	5	6	7
4 sec.	1 sec.	2 sec.	3 sec.	as pushbutt.	6 sec.	8 sec.	10 sec.

* Operation as pushbutton for 10 sec. max, after which standby mode is activated. To extend operation time over 10 seconds, use actuator item 346200 / 346210 configured with **MOD=5**.

S - type of call signal
The configuration of S determines the call tone of SPRINT - SPRINT L2 handsets. One can thus differentiate the calls from different entrance panels.

Table for SPRINT - SPRINT L2 handset call signal			
Configurator	0	1	2	3
Type of bell	2-tone	2-tone	2-tone	One-tone
	1200Hz	1200Hz	1200Hz	1200Hz
	600Hz	0 Hz	2400Hz	

For the SWING, PIVOT, POLYX, CLASSE 100 and AXOLUTE handsets, the **S configurator** associates the Entrance panel to the bell programmed in the handset. It is possible to chose between 16 different bells. In one-family systems, **S=9 configures the general call** and the handsets ring, the same as with the S=0.
