✓ We use BS316 marine grade stainless steel because it is tougher and more resistant to corrosion than other grades of stainless steel. SRS is the only manufacturer to use this top grade for all stainless steel vandal resistant door entry panels.

✓ We supply a BS316 stainless steel back box. Yes even the back box is BS316 stainless steel. At SRS we don't believe that you should receive galvanised or zinc coated mild steel which will show signs of rust within months. Your panels are designed to last a lifetime.

✓ Every nut, bolt and screw in the panel is also stainless steel for maximum corrosion protection.

**adding a prox. reader**  
Panels with suffix /08 have a 40mm square cut out and are suitable for fitting a proximity reader. Unless you specify differently, we will assume that you require our reader to be fitted and the panel will have fixings accordingly.  
See page 19 for suitable stand alone readers and control equipment. In general you will require a KDC250P kit.

**engraving**  
Don't forget to specify your engraving when you order your vandal resistant panel.

✓ We protect the speaker unit with a purpose designed BS316 stainless steel baffle plate against vandalism. Many panels use aluminium mesh (if anything) because it is cheaper.

## engravable panels

Our stunning engravable panels are engraved to your specification on our state of the art engraving machine. Please allow 5 working days for engraving. You can order engravable panels to your special size for delivery in 15-20 working days.

The amplifier / speaker unit is included in the panel
