

A2102 BUS power supply

Introduction

The power supply unit has two connection terminals, BUS(IM) and BUS(DS).

BUS(IM) – connection terminal for indoor handsets

BUS(DS) – connection terminal for a single door station or multi entrance switch A2300 for up to 4 door stations.

The unit has built in short circuit, overload and over voltage protections.

Terminals

N-Mains input (Neutral)

L-Mains input (Live)

BUS(IM)-Indoor monitors terminal

BUS(DS)-Door station terminal

Specification

Input Voltage: 100 ~ 240Vac

Input Frequency: 50 ~ 60Hz

Rated Output Voltage: DC 24V

Rated Output Current: 1.5 A

Working Temperature: 20C ~ +55C

SW Port Input Voltage: Max.230VAC,
1.8A

Dimension: 75*90*55mm
