20002710

SIMPLEHOME MODULE LOGIC FUNCTIONS

The logic functions module 20002710, connected to the SimpleHome system, can be used to carry out actions on the basis of whether certain conditions are detected or not. Rules can be created with up to 100 conditions, linked with AND or OR operators. Rules can be created using the result of other rules as conditions. The status of an ON/OFF input or output or of an analogue input or output, the exceeding of a temperature value, the setting of a specific operating mode for the heating or air conditioning system, etc. can be set as rule conditions. You can set the commands to be executed if the rule is confirmed and other commands to be executed if the rule is not confirmed, up to a maximum of 100 commands.

SIMPLEHOME MODULE LOGIC FUNCTIONS

MAIN FEATURES

Flush-mounted	Yes
DIN rail mounted	Yes

FUNCTIONS

Automation management	Yes
Loads management	Yes
Climate management	Yes
Lights management	Yes
Scenario management	Yes
Integrated temperature sensor	Yes

GENERAL DATA

Height (mm)	42
Width (mm)	42
Depth (mm)	18
Operating temperature (°C)	-10 ÷ 40

COMPATIBILITY

Home Automation system	Yes

MOUNTING/INSTALLATION

DIN modules (no.) (n°)	1

CONNECTIVITY

No. of Simplehome buses (n°)	1
