Description.

Description

For installations that require high-power indications when a call is received. This equipment can activate a bell, a siren or a light bulb when the call button on the door panel is pressed.

Small in size, they allow installation in electrical registers. They can be embedded in standard 10x10 cm boxes. They have adhesive strips for fixing, or they can be screwed directly to the wall.

Conventional System: uses common wires for the entire installation plus 1 call (or call return) wire per home.

Recommended in small/medium-sized buildings (up to approximately 50 neighbors), with several entrances and a concierge center. For urbanizations with general entrance and inner blocks.

Cabling:

- Intercom: 4 common wires + N (1 call wire per home).
- Video intercom: 7 common wires + 1 video coaxial + N (1 call wire per home).

Maximum installation distance depending on the section of the cable used (consult technical manuals)

Technical Details
