3/W CITYMAX BUS MULTIWAY KIT 230V

Reference

9023

EAN

8424299090238

Description.

Description

FEATURES

Simplified installation "all-to-all" intercom system.

It uses a single 3-wire installation BUS.

The system is compatible with the electronic door entry function: communication with the entrance panel and door opening.

Intercom kits for single-family homes, offices, companies, etc., with internal communication.

The street calls ring in all the telephones, being able to answer and open the door from any of them.

The ringtones are different depending on their origin, interior or exterior. The sound of the internal call is different from that of the plate to distinguish the origin.

Up to 12 extensions are allowed per dwelling, 6 "main" and 6 "secondary".

Communications are always secret. Only the entrance panel and one telephone or two internal telephones may be in communication simultaneously.

It is possible to restrict communications between secondary telephones, that is, calls cannot be made between them.

Technical Details
