

Product Code

F09454

IP/DUOX PLUS CAMERA INTERFACE

Reference

9454

EAN

8424299094540

Description.

Description

- Allows the integration of IP video CCTV cameras in a DUOX PLUS installation.
- It transforms the IP video signal (RTSP standard protocol) into a DUOX PLUS signal that is connected directly to the DUOX PLUS bus.
- Generally, an interface will be required for each camera installed in the DUOX PLUS installation. However, in the particular case of 2 cameras in the same Block, up to 2 cameras can be configured in the same interface (in this case a PoE switch will be necessary).
- Each camera will be powered externally with its additional power supply (ref. 9982+ref. 9984) or through a PoE switch.
- The interface will be powered directly from the DUOX PLUS bus.
- **Configurable by Wi-Fi, from the mobile** through an embedded webserver.
- An entrance panel can be associated to the interface, in such a way that, while the IP camera is being viewed, the opening of said associated entrance panel can be activated.

NOTE: It is not possible to have a visualization of the IP camera and at the same time have audio from a panel.

AUTO-ON OPERATION with Interface installed.

At rest, press the "camera button" on the monitor to auto-start with different panels / cameras. Pressing sequentially, the display is:

1. Panel 0 or Camera 0 of the block itself (one or the other).

- Panel 1 or Camera 1 of the block itself (one or the other).
- Panel 0 or Camera 0 of the General Entrance (one or the other).

Technical Details

TECHNICAL CHARACTERISTICS

supply voltage	18Vdc	24Vdc
Consumption at rest	140mA (max)	104mA (max)
active consumption	153mA (max)	110mA (max)
Operating temperature	-10°C	+55°C
Humidity (non-condensing)	5%	90%

Details.
