Mitho

Colour touch screen video entry system

MITHO is the innovative colour touch screen receiver designed for advanced use: it represents a new concept of user-system interface that emphasizes simplicity and easy access to the various functions available. Many innovations have been introduced in the new terminal, starting with the 4.3'' touch screen LCD display with 16:9 wide screen format which allows full-screen navigation through menus that can be selected without using visible keys, amplifying the user's interaction with the system. The navigation within the various menus is simple and straightforward, based on colour codes that facilitate the association of the coloured functions. MITHO is therefore much more than a normal video entry system: connected to X1, the 2-wire system by Bpt, it offers a series of innovative functions such as image zoom, video voicemail and messages (from the porter for example) with integrated receiver and handsfree audio functions.

- The first and unique touch screen video
- Video voicemail
- Image zoom

SYSTEM COMPATIBILITY

X1 — 2-WIRES

XIP — INTERNET PROTOCOL

300 — CAT5
