

4-users distributor AV1001/03

4-users distributor is equipped of :

- 4 outputs to connect 4 video housephone
- 2 terminals to connect the bus

BUS1 BUS2 BUS3 BUS4

BUS IN BUS OUT

It allows the sectioning of the system thanks to its internal PTC.

Any short-circuit in one of its 4 outputs automatically exclude only this distributor while the other parts of the system continue to work.

The outputs not used must be kept free and the jumper must be inserted **JUST** on the last distributor of the riser.
