

### 2-WIRE BUILDING KIT: THE EASY AND ACCESSIBLE SOLUTION FOR BUILDINGS WITH A SINGLE RISER.

Building Kits from Comelit are pure 2-wire video entry phone systems that use only 2 wires from the external panel to the monitor, without the need for any additional switchgear.

The video kits can be configured with a variety of external panels and internal monitors, have been designed for simple installation and are suitable for single houses up to systems with 100 users.

#### KEY FEATURES:

- Up to 100 users
- 3 monitors in parallel
- 1 main internal unit and 2 secondary units
- 260 meters maximum distance between external unit and internal unit
- 130 meters maximum distance between external unit and power supply unit
- 130 meters maximum distance between power supply unit and last internal unit
- Up to 32 users with analogue entrance panel
- Up to 100 users with digital entrance panel
