

The Digitha UK has been designed specifically for the requirements of the UK market. Having all of the features of the standard Digitha panel, the UK version is produced with a proximity window that will accommodate most leading brands. A version is also available with the proximity window completely removed in order to suit any situation.

CUSTOM FINISHES

Unlike the standard Digitha, the Digitha UK can be produced in any finish including Satin black, Highly polished or even Classic bronze effect. In fact, any standard RAL or specialist coating can be used to ensure the Digitha UK panel perfectly complements its surroundings.
