

### CVK Series Video Kits

The SRS CVK kits are a popular range that offer a compact profile, allowing for installation in many different environments, from doorways to gate posts. They include a high quality colour CCD day/night camera. All kits include a 4" colour monitor that can be wall mounted. Also included is a 12V and a 14.5V DC power supply for the panel and monitor respectively.

- Panels made from high quality aluminium or ABS plastic
- Surface mountable panels
- High quality Day/Night camera
- Great quality 4" video monitors
- 12V DC power supply for the panel and 14.5 V for the monitor

## Dimensions - Standard Layout

### CVK Series - Video Kits

Available with or without keypads these are stylish, slim video door entry panels that are surface mountable. Two of the panels come with a rain shield which protects them from bad weather conditions as well as shading the high quality camera lens from direct sunlight. The lens benefits from a built-in LED to illuminate the caller in low light conditions.

Included is a high quality 4" SRS hands free monitor featuring touch sensitive controls and comes with it's own PSU.

The keypad versions benefit from an illuminated keypad which means they can be easily used day or night and are fully waterproof. They can also connect to a gate operator, just add the 9334 interface relay.
