MADE FOR THE CITY

# A PURE URBAN SYMBOL

Cityline is the original and cutting-edge convex-curved profile outdoor panel for audio and video door entry systems. Provided with a pure urban character, it is the special touch for projects and buildings in any city worldwide.

# OVER A DECADE AMONG US

Among us for over a decade, in complete harmony with our homes, with our lives.

- • The Cityline panel has become a legend in our streets, a truly urban symbol the world over. Cityline just keeps on making history.

## THE START OF AN ERA

The FERMAX Cityline design of audio & video door entry panels was launched in 1992.

Its author, **Ramón Benedito Graells - National Industrial Design Prize 1992** - revolutionized the market with the Cityline, designing the first ever door entry panel on the market to use a **convex-curved aluminium profile**. Its features positioned it as **the top of the range door entry system in the FERMAX catalogue**.  
Synonymous with luxury and quality.

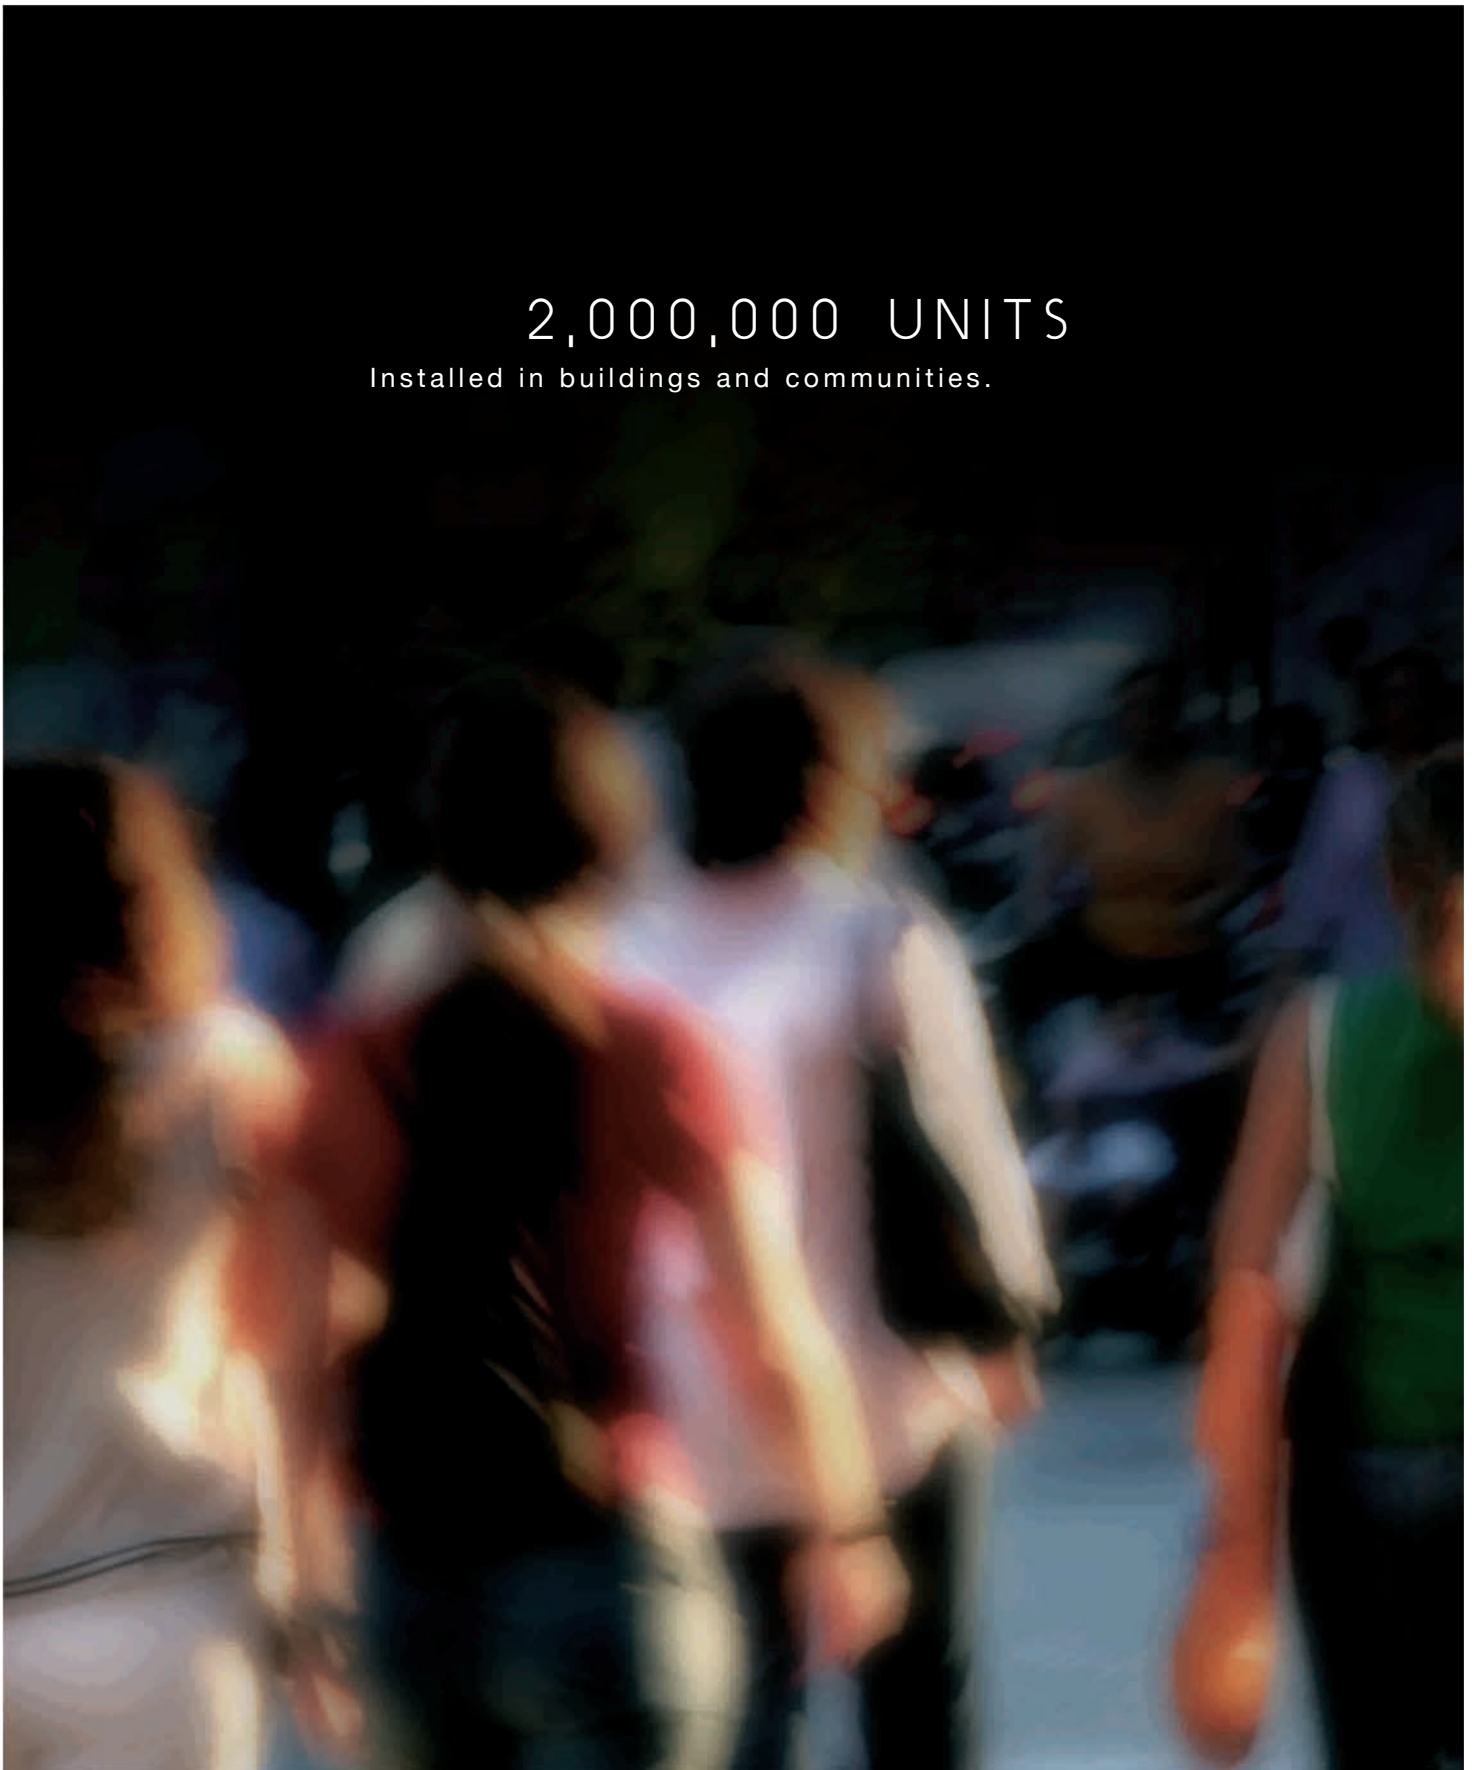

In 1991 Cityline received the **Valencia Prize for Industrial Innovation** awarded by IMPIVA\*.

\*IMPIVA: Valencian Institute of Small and Medium-sized Enterprises.

2,000,000 UNITS

Installed in buildings and communities.

# AN AMAZING SUCCESS

“ The exquisite industrial design integrated in harmony with the urban environment and its simplicity of installation and versatility **gave rise to an unprecedented demand.**

9 series, 9 panel sizes enabled users to personalize each installation by the number of homes and the typology of the building, with all the combinations of pushbuttons and accessories available.

All sales expectations were covered in its launch.

Today, 2,000,000 buildings have a FERMAX Cityline audio or video entry panel.

## THE FERMAX FLAG

- Today, Cityline is the best recognized panel in Europe and all over the world, and its essence and singular features - its curves, continuous profile, finger-shaped pushbutton, stylish frontals, etc.- are the basis of a multitude of similar products from manufacturers from all over the world.

The Cityline panel, however, has a series of features that make it unique and incomparable:

- It has a frontal or lateral articulation system making installation and connection easier.
- It includes a rubber seal to ensure a perfect fit between panel and box.
- Fixing screws are hidden by protective covers located in the upper and lower finishes.
- The call buttons have special silver plated contacts making them more robust and durable.
- The amplifier is manufactured in SMD and subjected to a tropicalization process to endure the most adverse weather conditions. It has outdoor panel-home and home-outdoor panel volume control as well as acoustic call tone confirmation.

The Cityline panel is the Fermax flagship.

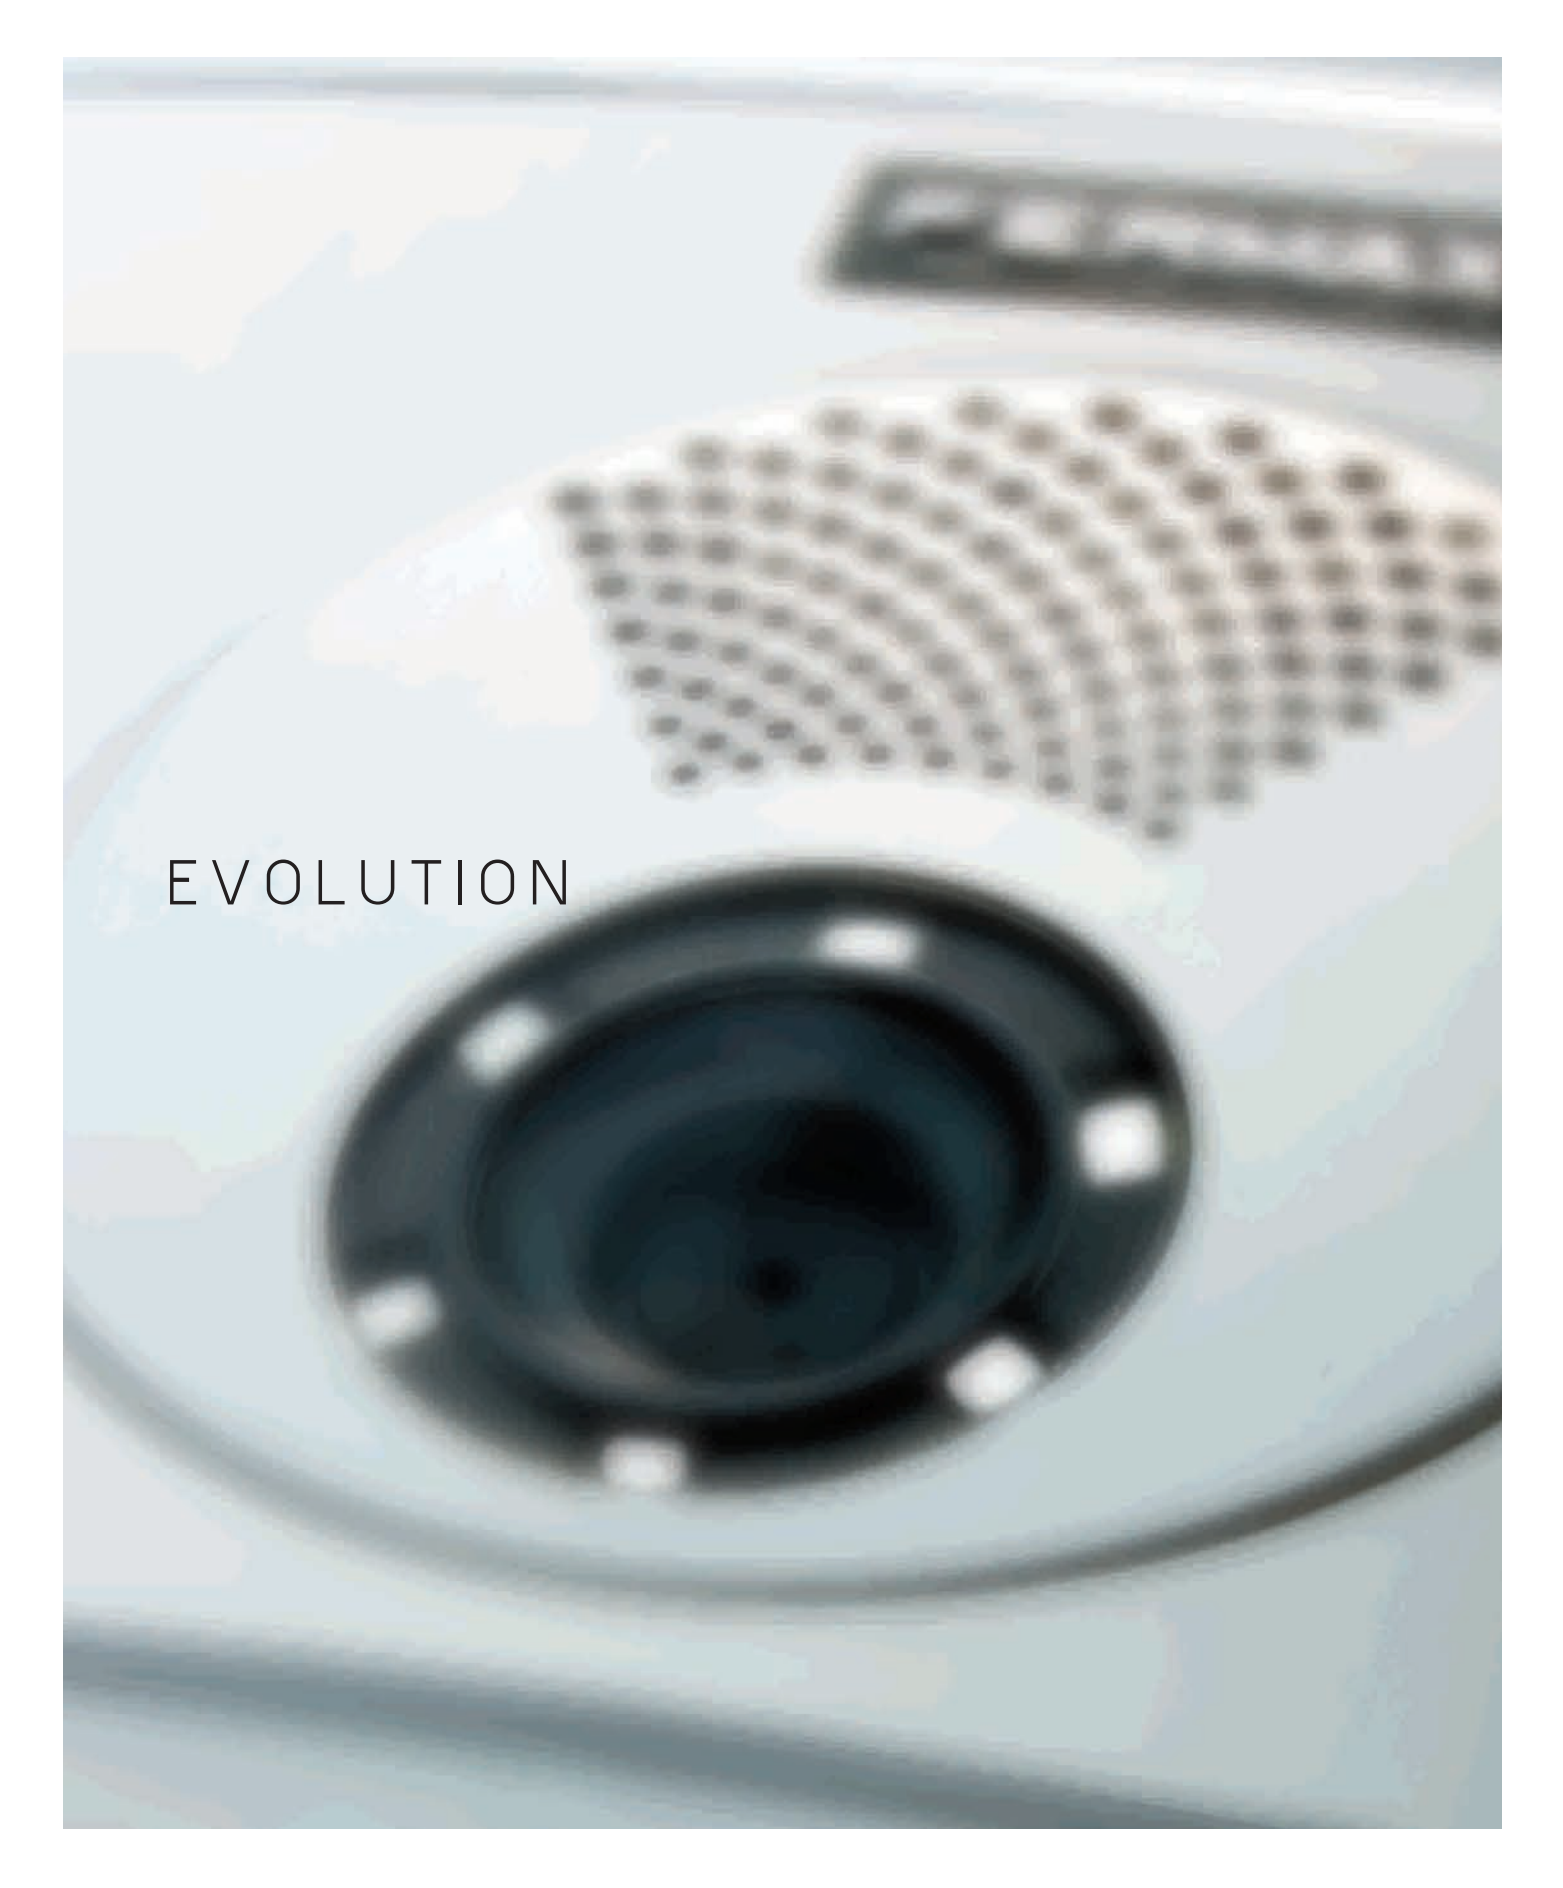

FORECASTING THE FUTURE

THE CITY PANEL EVOLUTION

BALANCED

A close-up photograph of a vintage telephone handset. The handset is light blue with a black circular receiver at the bottom and a white grid speaker at the top. The word "EVOLUTION" is printed in black capital letters on the left side of the handset.

EVOLUTION

## BALANCED EVOLUTION

- We present the new Cityline. The balanced evolution of the Fermax flag. Renewed and more graceful. More robust. With a pure, exquisite design and new finishes.

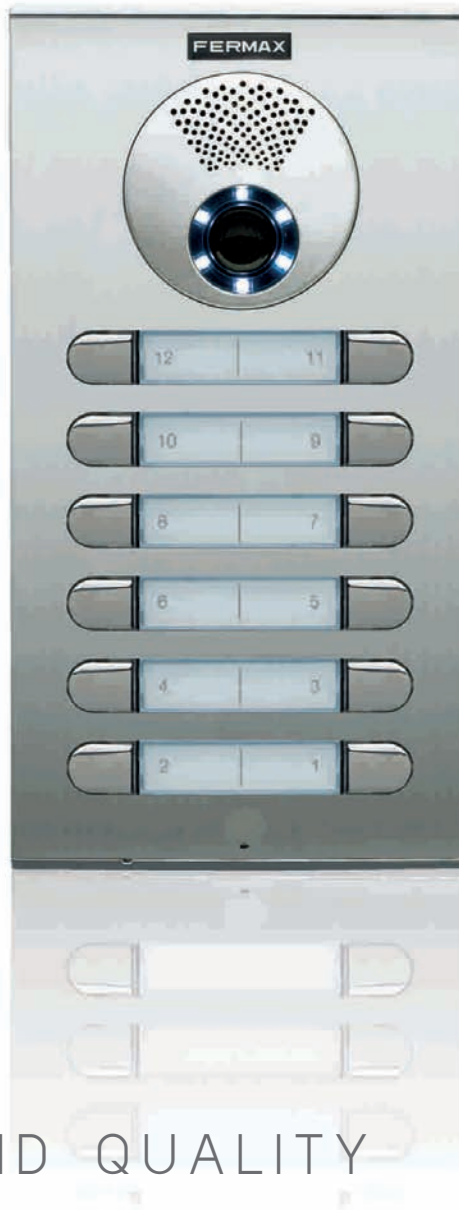

ROBUST

STYLISH

MODERN

## LUXURY AND QUALITY

The new Cityline, also designed by Ramón Benedito Graells, maintains its original spirit and essence, and constitutes a graceful evolution in line with the times.

We started the project of restyling the panel under the assurance of the proven success enjoyed today by Cityline, and with 2 clear goals:

1. That the new version should be superior in luxury, quality and style.
2. Total compatibility between both versions, ensuring its immediate substitution and replacement.

---

## NEW CITY FEATURES

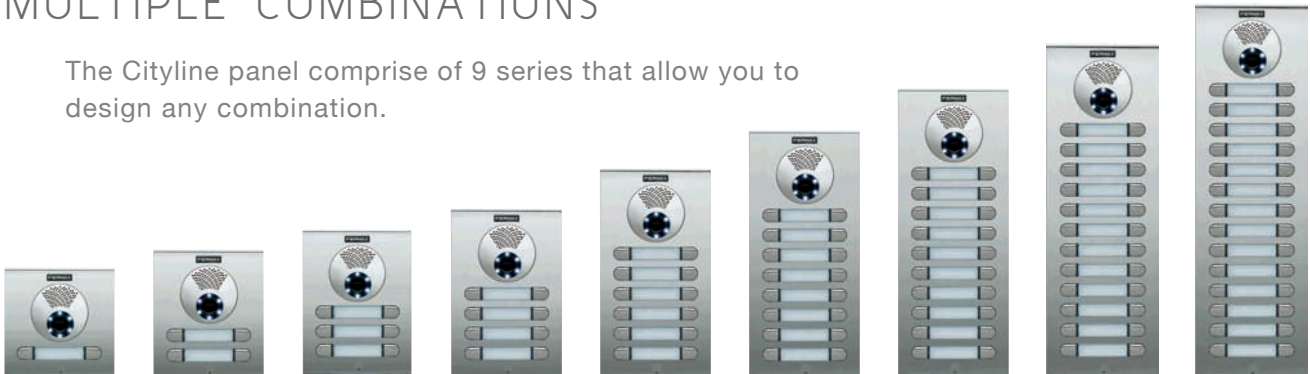

---

- Cityline is made of highly weather resistant anodized aluminium - extruded, polished and burnished,
- Characterized by its convex-curved profile, maintaining the same features as its predecessor.
- The audio and video functions are integrated in the same module, allowing you to renew an audio entry panel for a video door entry panel instantly, using the same flush-mounted box and keeping the same measurements
- The pushbuttons, in simple and double format, and the tops are manufactured in zamak and a natural chromed finish.

- The panel has permanent card slot lighting by means of low consumption, maximum duration LEDs.
- The camera has night vision lighting and a new high precision pan&tilt system for lens adjustments. It includes a wide angle lens.
- The electret microphone is located in the lower top to prevent feedback.
- With built-in high performance elliptical loudspeaker and a high powered amplifier (2W).

## MULTIPLE COMBINATIONS

The Cityline panel comprise of 9 series that allow you to design any combination.

FERMAX

# ACCESSORIES

•• The new Cityline has all the accessories necessary for installations in any place, support or situation.

Surface box.

Protective casing.

Decorative trim frame.

Angular complement.

Hood.

· Flush box: manufactured in aluminium and zamak with practical hinges.

· Surface box: needed in facades (marble, stone...) where it is not possible to make a hole in the wall.

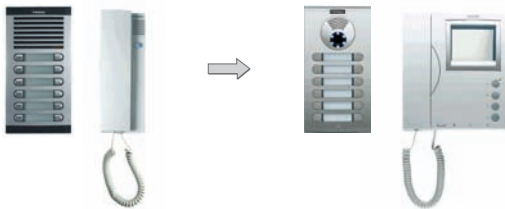

· Protective casing: recommended in salty atmospheres and areas with adverse weather conditions. Protects the panel and serves as a decorative complement.

· Decorative frame: covers the gaps left by previous panels and serves as an aesthetic complement.

· Angular complement: to install the panel in situations of difficult access. For example: behind a fence.

· Hood: to protect the outdoor panel when its location may be affected by rain, snow...

## TOTAL COMPATIBILITY, IMMEDIATE REPLACEMENT

Replacement of the Cityline panel by the new design is immediate, using the same system of fitting the box and all its accessories.

Instant renewal of audio for video door entry system:

- Same standard measurements.
- Same panel-flush mounted box anchorage system.
- Same accessories.
- Same installation.
