

Exedra Video Monitors

With a stylish, compact design and unrivalled versatility, Exedra was produced as the result of a competition workshop intended to exploit technology and blend technical skills with design and ergonomics to produce an unbeatable feature-packed package.

A completely modular system, it can be wall mounted or used as a tabletop set. The diversity of combinations possible with its various components meet every possible need.

Available as a video monitor with the option of a black & white or colour monitor, the Exedra range also features extending telephone-type cords and a special cradle to prevent the receiver falling. Various options are available for System 200, System 300 and X1 systems.
