

Ref. 9607 ILLUMINATION LAMPS FOR PANELS

DESCRIPTION

Lamp of spare parts for the pushbuttons of CityClassic outdoor panel.

CityLine Classic is the "continuous profile" outdoor panel line for buildings.

The outdoor panels are manufactured in anodized aluminium, highly resistant to rough weather and climate changes.

The panel design stands out for its curved-convex profile. A cellular rubber airtight seal included assures a perfect panel-to-wall fit to prevent water filtrations.

Available in several colours: aluminium, golden or bronze and white.

Bruto panel is the vandal outdoor panel line with continuous profile and modular design. It is advisable in difficult areas, banks, offices, companies, etc., as well for installation on rustic or stone walls.

Bruto panels are manufactured using an aluminum injection system to offer maximum resistance, and are painted with polymerised nylon. The mounting system of the modules make them highly robust.

The panel is attached to the flush-mount box by means of stainless steel, vandal-resistant security screws, which can only be removed with a special key, which is supplied with the panel.

The 6mm thick polycarbonate nameplates and window for the camera resist the strongest impact and highest temperatures.

TECHNICAL FEATURES

- Lamp consumption: 70 mA.
