- THREE DIFFERENT COLOURS: WHITE, ANTHRACITE AND PLATINUM
- INTEGRATED HEARING AID SETUP

## COMPATIBLE WITH

Minimal, stylish and extra-slim designed by Citterio. Signo audio and video door phones are the smallest their kind on the market: it is very compact and is only 5 cm thick. Signo is ideal for all decors, thanks to its great style and versatile finish. Three colours are available: shiny white, anthracite and platinum. The harmonious, perfectly flat surface has no sharp edges: profiles are rounded, like the user-friendly buttons (door opener plus 3 auxiliary buttons for operating secondary

services, such as switching on the staircase lights, opening a secondary lock and intercom calls). The Signo black and white or colour video door phone is the ideal combination of quality and convenience: the LCD display 4" in size (colour version) or 4.5" (black and white). The Signo video door phone manages electronic calls through a dedicated speaker positioned under the microphone and is compatible with all the main Urmet video door phone systems. Call volume

is adjustable by means of a three-position potentiometer (loud-soft-mute, the latter with mechanical red indicator). The key button has a green light. The button add-on with six buttons, a switch and two LEDs can be used to increase performance: the LEDs can be conveniently connected to indicate, for example, door open, call transfer, and so forth, while the switch is used to transfer the call towards another device. Signo can be installed on table top using a transparent support,

harmonising the monitor design and allows to simply hang up the handset. Wiring is extremely simple and practical. Urmet brackets can be used to connect Signo to the most important analogue and digital systems. The apartment station is ready for operation with hearing aids capable of picking up the electromagnetic waves emitted by the apartment unit speaker.
