door entry panels – SPA range

(standard panel aluminium)

The SPA panels are supplied in the model 900 series door entry systems and are a popular choice due to their high durability, resistance to corrosion and low cost.

These panels offer a contemporary and attractive style. The panels up to 10 buttons are manufactured from 3 mm brushed anodised aluminum with an integral grill that protects the speech unit and complements the surface back box. The grill has fixings on the rear to firmly secure the speech unit.

As standard, the panels are supplied with a low-profile surface-mounting box moulded in black to complement the push-buttons. Alternatively, the panels can be supplied with a flush fitting zintec back box and vandal resistant bolts.

Model SPA1

Model SPA4

Model SPA6

Panels 1 to 10 buttons
They are manufactured from 3 mm brushed anodised aluminium with an integral grill that protects the speech unit and complements the surface back box. The grill has fixings on the rear to firmly secure a model 61 speech unit.

A single push-button with integral nameplate is provided for each station including an optional Tradesman's button. This push-button has a versatile design whereby pressure from any part of the nameplate will initiate a call. The nameplate can easily be removed

from the front for replacement or amendment of the name or number on the paper insert (included with each button).

Optional backlighting can be achieved by fitting a model SPA-LAMP lamp unit to each push-button.

Panels above 10 buttons
These panels are manufactured from 4mm brushed anodised aluminium and are available in even numbers and for flush-fitting only. A single push-button is provided for each station including an optional

Tradesman's button. A nameplate is positioned adjacent to the push-buttons. Optional backlighting can be achieved by fitting festoon lamp units to the back-box; specify model 37 holder and model 36 bulb.

The back box is manufactured from Zintec, a coated steel material that prevents tarnishing and rusting. The panel is attached to the back box by means of vandal resistant bolts (model 38) requiring a special tool (model 39) for their removal. These bolts and one special tool are supplied with each panel.

Model SPA12

Ordering information

Order a model SPA n, where n is the number of push-buttons required e.g. a 9 button unit would be a model SPA9.

(Please include an extra push-button should a Tradesmen/Services button be required).

All panels up to 10 buttons require a model 61 speech unit.
Panels above 10 buttons require a model 51 speech unit.

Sizes above 10 buttons use a different style panel and are flush fitting only. Sizes on application. Panel dimensions are approximate and may change without notice.

SPA Door Entry Panel Dimensions   SPA1 to SPA10 and SPA1F to SPA10F
