Stainless Steel Vandal Resistant Audio Digital Entry Panels

The new Vandal Resistant Digital Panel for 200 and 300 Audio and Video systems features:

- Illuminated keyboard
- Designated 'T' for tradesman button
- Multiple block name select by a single key
- Alphanumeric illuminated LCD display
- PIN code input enabling residents door open

A unique feature of the BPT digital entry panel is the ability to display pre-programmed messages or information text. Up to 8 scrolling screen messages can be viewed by callers at the entry point, for example the installer's company name and telephone number could be shown.

A second unique feature used, for System 300 models only, is the ability for visitors at main entrances of a site to be able to firstly select the block they wish to call and then enter the apartment number. This feature enabled on a single key has the ability to select up to 256 blocks.
